ImmuMax®

**Dietary Supplement**

**Synergy** - joint action of two or more agents (drugs) that, taken together, produce a greater effect than the sum of their individual effects.

**ImmuMax syrup** is a dietary supplement, sold in pharmacies and health food shops without prescription. According to Directive 2002/46/EC of the European Parliament and of the Council of 10 June 2002 “the labelling of a dietary supplement must not attribute to it the property of preventing, treating or curing a human disease, or refer to such properties”.

**ImmuMax syrup** is a dietary supplement that strengthens our immune system. ImmuMax consumption is particularly beneficial for children with a weakened immune system. An impaired immune system may manifest itself in many ways e.g. propensity to infections or recurrent infections and allergy. Regular usage of ImmuMax syrup supports immune system during or after treatment with antibiotics, x-ray, chemotherapy and in cases of physical exhaustion. ImmuMax syrup can also be used to prevent infections (e.g. acne), and reduces muscle pain after intensive physical exercise if taken beforehand. It is also helpful in alleviating joint problems.

**Recommended daily dose**

The product should be stored out of the sight and reach of young children at room temperature and after opening in the fridge. This syrup is a natural product and therefore the taste may vary, and the bottle may contain precipitation, which does not constitute any threat.

**Additional remarks:**

Do not use if you are allergic to any ingredient. Do not use after expiry date. Consult your health care professional before administering to children below the age of 1 or to pregnant or nursing women. A dietary supplement cannot be used as a substitute for a varied diet.
