

proMyalgan[®] Cream

Contains a group of plant extracts obtained through the innovative Bio-Enhanced Extraction technology which guarantees the quick and efficient action of the ingredients as well as maximum safety.

Ingredients: Astragalus Root extract (*Astragalus membranaceus*), Wild Yam extract (*Dioscorea villosa*), German Chamomile extract (*Matricaria recutita*), Pineapple fruit extract (*Bromelia ananas*), taurine, MSM.

Composition: AQUA, PARAFFINUM LIQUIDUM, CETEARYL ALCOHOL, CETEARETH-20, GLYCERIN, BIO-ENHANCED EXTRACTS OF FINE HERBS, SOY ACID, SODIUM POLYACRYLATE, CAPRYLGLYCOL, ETHOXYDIGLYCOL, STEARYL ALCOHOL, BEESWAX ACID, METHYL-PARABEN, PROPYL-PARABEN, VANILA SCENT.

Properties and activity:

Myalgan[®] Cream applied onto soothes, relaxes and restores its freshness and elasticity.

Description of active ingredients:

MSM (*methylsufonylmethane*): is used by the organism to create new cells. Vitamins and amino-acids react with MSM in this process. The human body reconstructs cells incessantly but without proper nutrition and vitamins new cells are dysfunctional. Supplementation of MSM is essential for the right healing processes to occur.

Astragalus Root Extract (*Astragalus Membranaceus*): improves circulation and blood flow, helps remove toxins. It has an energizing and toning effect.

Wild Yam Extract (*Dioscorea villosa*): effectively reduces inflammation and diminishes the feeling of fatigue. The root of wild yam contains compounds which are precursors of DHEA which regulate the production of that hormone, soothe pain and reduces muscles tensions.

German Chamomile Extract (*Matricaria Recutita*): provides volatile oils alfa-bisabolol and their oxides, matricine and bioflavonoids apigene, luteolin and quercitin. They act antiphlogistically and have an immense diastolic and antioxygen effect.

Pineapple Fruit Extract (*Bromelia ananas*): contains bromelain-proteolytic enzyme, which acts antiphlogistically and helps heal muscular injury, mitigates pain and diminishes dropsy.

Taurine: helps stabilize cell membranes in the electrical tissue of the brain or the heart. It is believed that taurine modulates the activity of neurotransmitters, helps transport sodium, potassium, calcium and magnesium through the cellular membrane. It also helps produce nerve impulses.

Directions for use: For external use only. Apply small amount of cream and massage into skin onto the internal surface of forearm and/or thighs. Use 1 - 2 daily.

Store below 25 °C and protect from direct sunlight. Store in a place inaccessible to children.
